STOLEN MARMON CAR BEING HELD HERE BY SHERIFF W. P. MAHONEY

NEW SIGNS BEING COMPLETED

The Arizona Art and Ad Company under the management of Boyd and Alexander, the Gold Dust Twins, are now completing the largest road bulletin ever turned out here. It is 44 feet in length and is being done for the Central Commercial Company. It will be placed in the canyon just below Kingman. Eighteen road signs have just been completed for the Tarr, McComb and Ware Commercial Company. Each sign has an arrow on it, with the direction and distance to different points. They will be placed at junctions of the different roads throughout the county and in addition to being a good advertisement for the firm putting them out, they will be a help to travellers.

SAN FRANCISCO MINING ENGINEER LIKES DISTRICT

Edward C. Reed, a well known mining operator of San Francisco, has been looking over the gold section of San Francisco mining district, having been a guest of C. F. Nourse, at the

Gold Chain, this week. Mr. Reed was so taken with the country that he has optioned several of the good looking veins of the Union Pass section and expects to return from San Francisco, where he went last night, as soon as he arranges his affairs and can conveniently get away. He has obtained some of the good looking prospects of the new camp and will soon be operating on a large scale.

The Power Of Interest

We recently saw a bank advertisement which showed that if one cent had been deposited at FIVE PER CENT compound interest a thousand years ago, the accumulation would now be some fifteen trillions four hundred sixty-three billions of dollars.

Comparatively few of us can or would want to live a thousand years or have that much money, but any of us can have the benefit and advantage of the same rate of interest, for Savings Accounts at this bank draw FIVE PER CENT, and it's a mighty comfortable feeling to have one of them whether you're expecting to live a thousand years or not.

Better start an account today.
